

**SEQUENTIAL THERAPY COMPRISING
20(S)-CAMPTOTHECIN AND A PYRIMIDINE BASE ANALOG**

Inventors: Joseph Rubinfeld, Karl Mettinger, John Lyons, Larry Romel

5 A method is provided for treating a patient having a disease associated
with undesirable or uncontrolled cell proliferation, the method comprising:
administering to the patient a 20(S)-camptothecin for a period of time during
which a pyrimidine base analog is not being administered to the patient; and
administering a pyrimidine base analog to the patient.
